[First](#) [Prev](#) Page **1** of 5 [Next](#) [Last](#) >>☒ [Diabetes Mellitus](#)

1. A heterogeneous group of disorders characterized by HYPERGLYCEMIA and GLUCOSE INTOLERANCE.

☐ [Diabetes Insipidus](#)2. A disease that is characterized by frequent urination, excretion of large amounts of dilute URINE, and excessive THIRST. Etiologies of **diabetes insipidus** include deficiency of antidiuretic hormone (also known as ADH or VASOPRESSIN) secreted by the NEUROHYPOPHYSIS, impaired KIDNEY response to ADH, and impaired hypothalamic regulation of thirst.☐ [National Institute of Diabetes and Digestive and Kidney Diseases \(U.S.\)](#)3. Component of the NATIONAL INSTITUTES OF HEALTH. It conducts and supports basic and applied research for a national program in **diabetes**, endocrinology, and metabolic diseases; digestive diseases and nutrition; and kidney, urologic, and hematologic diseases. It was established in 1948.

Year introduced: 2008

☐ [Diabetes Complications](#)4. Conditions or pathological processes associated with the disease of **diabetes mellitus**. Due to the impaired control of BLOOD GLUCOSE level in diabetic patients, pathological processes develop in numerous tissues and organs including the EYE, the KIDNEY, the BLOOD VESSELS, and the NERVE TISSUE.

Year introduced: 2005

☐ [Diabetes Insipidus, Neurogenic](#)

5. A genetic or acquired polyuric disorder caused by a deficiency of VASOPRESSINS secreted by the NEUROHYPOPHYSIS. Clinical signs include the excretion of large volumes of dilute URINE, HYPERNATREMIA, THIRST, and polydipsia. Etiologies include HEAD TRAUMA, surgeries and diseases involving the HYPOTHALAMUS and the PITUITARY GLAND. This disorder may also be caused by mutations of genes such as ARVP encoding vasopressin and its corresponding neurophysin (NEUROPHYSINS).

Year introduced: 2000

☐ [Diabetes Insipidus, Nephrogenic](#)
